

Welcome to the Electrical Technology program at Region 10 Technical High School, where innovation meets hands-on learning. In this program, you'll learn the essential skills needed to power the world around us. From residential wiring and industrial electrical systems to renewable energy and smart technologies, our curriculum covers it all. Guided by experienced professionals, you'll gain in-depth knowledge of electrical theory, safety protocols, and the latest industry standards. Our state-of-the-art labs give you the opportunity to work with real-world tools and technologies. Whether you're interested in becoming an electrician, electrical engineer, or energy technician, this program lays the foundation for a bright future in the electrical industry. Join us in the Electrical Technology program and turn your passion for electricity into a powerful career.
