

Welcome to the Foundation of Technology program at Region 10 Technical High School! This program offers students a unique opportunity to explore and gain foundational knowledge across various technical fields. Throughout the year, students will be introduced to our 13 core programs, giving them hands-on experience and a taste of different career paths. Whether you're interested in Automotive Collision Repair becoming a Certified Nursing Assistant, our program will provide you with the basic skills and understanding needed to succeed. By the end of the Foundation of Technology program, you'll have a clearer understanding of which technical field aligns with your interests and career goals.
