

Welcome to the General Trades program at Region 10 Technical High School, where students gain a diverse set of skills essential for success in today's workforce. This program offers hands-on training in a wide range of trades, from carpentry and plumbing to basic electrical work and HVAC systems. Our students learn the practical skills needed to tackle various projects, making them versatile and highly employable across multiple industries. One unique aspect of the General Trades program is the opportunity for students to run the Dirigo Diner, where they apply their skills in a real-world setting, managing everything from maintenance to customer service. This experience not only enhances their technical abilities but also teaches valuable 21st-century skills like teamwork, problem-solving, and communication. In the General Trades program, we focus on preparing students for a dynamic and evolving job market, equipping them with the adaptability and knowledge needed to thrive in any trade they choose to pursue.
